

Ahmad Iqbal

Front-End Developer

I am a passionate junior frontend developer dedicated to delivering flawless user experiences. With a solid foundation in HTML5, CSS3, Bootstrap 5, Tailwind CSS, Material UI, JavaScript, and React.js, along with a basic understanding of Next.js, I have one year of practical experience. I am currently seeking an entry-level position to contribute my creativity and skills to a dynamic development team.

WORK EXPERIENCE

Front-End Developer

Tech Mentors (Pvt) Ltd.

08/2023 - 2024

Islamabad ,pakistan

Achievements/Tasks

- I worked at Tech Mentor company for 6 months. My role involved receiving an API and using it to display data and incorporate it into tables.
- I made a Dashboard for Tech Mentor using React and Material UI. I also used a charts library to show graphs and pie charts.

Wordpress + SEO

Softcrust | Islamabad

10/2022 - 01/2023

Achievements/Tasks

- In this company, my role involved chatting with clients on Fiverr and acquiring projects. Here, I have worked as a WordPress developer and simultaneously handled SEO tasks such as technical SEO, on-page SEO, off-page SEO, etc. I have collaborated with many clients regarding speed optimization and other on-page adjustments.
- And I have created several websites in WordPress, such as blog websites, business websites, portfolio websites, and e-commerce websites.
- Wordpress Project Links:

PERSONAL PROJECTS

TO-DO-LIST-

- I have created a TO DO LIST in which the user can do their daily routine activities and can also remove them from the list whenever they want.
- github Link: <https://github.com/ltx-Ahmed/TO-DO-LIST->

Contact-Manager

- I have created a contact manager where users can enter their name and email, view them in the display, and delete them whenever they want.
- github Link: <https://github.com/ltx-Ahmed/Contact-Manager>

Products-API-with-Axios-library

- I have rendered 30 products from a products API in a table format and displayed their data.
- github Link: <https://github.com/ltx-Ahmed/Products-API-with-Axios-library>

Store-API

- I have displayed the data from the store API in table format.
- github Link: <https://github.com/ltx-Ahmed/Store-API>
