PERSONAL PROJECTS

PARHLO Mobile App (02/2020 - 08/2020)

- "PARHLO" app is a tool to assist the students/parents to find private tutors in an interactive manner.
- It aims to complement the efforts of a student to find a desirable teacher. The categories can be defined by subject specialization, location, and fees.

Towards Data Exploratory And Predictive Analysis of COVID-19 on Images Dataset (02/2021 - 06/2022)

- Coronavirus (COVID-19) is causing critical health problems to individuals all over the globe. We have used Artificial Intelligence (AI) along with powerful and advanced Deep Learning (DL) procedures for accurate and efficient disease detection from chest CT images.
- Deep Convolutional Neural Network-based (CNN) strategies are explored and aided by AI and DL approaches for better outcomes.
- We have used the densenet201 model in our work. Initially, the transfer learning model was used for feature extraction and also fine-tuned the model to achieve better results.
