ABOUT ME

I am **Jahanzaib Ali**, a **Web Application developer** with over **2+ years** of experience in building dynamic, responsive applications using **PHP, Laravel, MySQL, HTML, CSS, Bootstrap, JavaScript, and jQuery**. I also work with **API development, AI-driven automation**, and custom machine learning model training to streamline workflows and enhance user experiences. I'm passionate about creating efficient, modern solutions and constantly evolving with new technologies.

WORK EXPERIENCE

🏢 **Creative IT Park – Islamabad, Pakistan**

City: Islamabad | Country: Pakistan

Team lead (Frontend) & Mid level Laravel Developer

[26/03/2024 – Current]

Laravel backend development: Using Laravel, scalable web applications were designed and developed, incorporating complex business logic, role-based access control, authentication systems, and RESTful APIs to support real-world use cases.

Database Design & SQL Development: Using MySQL and SQL Server, relational database schemas were developed and optimized. To support application data layers, I created sophisticated queries, stored procedures, and carried out database migrations and seeding in Laravel.

School Management Systems: To automate academic and administrative procedures, I developed specialized school management systems with features like teacher and student portals, attendance monitoring, fee management, and reporting dashboards.

Accounting System Development: To ensure data integrity and adherence to accepted accounting standards, accounting modules were created to handle financial transactions, ledger entries, invoicing, and financial reporting.

Point of Sale (POS) Systems: Developed custom POS solutions for retail and inventory businesses, with features like barcode scanning, multi-user support, invoice creation, real-time stock synchronization, and sales reporting. Provided seamless performance in both online and offline modes with database synchronization and responsive user interfaces.

Custom CMS Solutions: Using Laravel Blade templates and admin panels, I developed adaptable content management systems that were suited to the needs of our clients and gave them simple control over the media, content, and layout of their websites.

API Development & Integration: Using Laravel, I created reliable RESTful APIs for front-end-backend communication and third-party service integration. facilitated the safe and effective transfer of data between various systems.

Frontend Collaboration: To ensure a flawless user experience, I worked closely with frontend developers to integrate Laravel with responsive UI components using jQuery, JavaScript, and Bootstrap.

Map & GIS Integration: Mapbox, CesiumJS, and 3D building visualizations were integrated with cutting-edge mapping solutions to produce geolocation features and interactive spatial experiences.

Development of Local and Business Websites:

- created data-driven, dynamic websites for schools that improved communication with parents and students.
- created ERP-like systems, such as analytics dashboards, order tracking, and inventory management, for companies that sell products.

Solving problems and debugging: Improved application load times and reliability by locating and fixing bugs, performance problems, and logical errors in code and database queries.

In order to deliver high-quality software solutions on schedule, I worked with cross-functional teams that included project managers, frontend developers, and UI/UX designers in Agile workflows.

 **Codify Pvt Ltd** – Rawalpindi, Pakistan

City: Rawalpindi | Country: Pakistan

Intern web Developer

[15/10/2023 – 20/03/2024]

Project Involvement: Worked on projects such as StayRunners and MoveYellow.com, contributing to both backend and frontend development.

Backend Development: Assisted in developing and maintaining backend components using Laravel and MySQL.

Frontend Development: Implemented responsive and user-friendly frontend interfaces using HTML, CSS, Bootstrap, JavaScript, and jQuery.

API Integration: Supported the creation and integration of APIs for seamless data exchange.

Team Collaboration: Collaborated with senior developers and other team members to ensure project success and meet deadlines.

Learning and Development: Actively participated in training sessions and hands-on projects to enhance my technical skills and practical knowledge.

EDUCATION AND TRAINING

Bachelor of Software Engineering

Iqra University Islamabad [15/06/2020 – 21/07/2024]

City: Islamabad | Country: Pakistan | Website: <https://iuisl.iqra.edu.pk/> | Field(s) of study: Information and Communication Technologies: • Software and applications development and analysis | Final grade: 3.4 | Level in EQF: EQF level 6 | NQF Level: 6 | Type of credits: 3.4 | Number of credits: 4 | Thesis: JusticeOnTrack

During my Software Engineering degree, I learned full-stack web development with **PHP, Laravel, MySQL, HTML, CSS, Bootstrap, JavaScript, and jQuery**. I gained experience in **API development, SDLC, Agile practices**, and **project management**. My studies also strengthened my problem-solving skills and taught me to work effectively in team environments while staying updated with the latest tech trends.

SKILLS

Multiple PHP (Laravel) Projects / FrontEnd: HTML, CSS, JavaScript / ReactJS / NodeJs / API DEVELOPMENT / Api Integrations / ajax / jquery / json / gsap animation / tailwind css and bootstrap / laravel / mysql / database / mapbox / cesium map / SASS(SCSS) / Canva, Figma / Python / Automations / AI Automation

PROJECTS

[13/05/2024 – Current]

Lynx (school management system)

[Current]

coworkit.co

Dating Application

SLS (school management system)

Stayrunners.com
