PROJECTS

MAJOR PROJECTS

Node.js Application for Managing Logs and Automating Stats, along with Data Updates in PostgreSQL from a CSV File.

- Develop a Node.js Express backend application to read logs receive from the Operator (Jazz Pk) and share daily statistics with the team.
- Read the CSV and Update the data in Db on daily basis.
- Check the log file on a server hourly basis and read the file if received, and handle the operation accordingly.

Automatic Testing with puptear to ensure the application performance saves time by excluding the manual testing.

- Develop a Node.js script that interacts with the website to test the functionality like login, billing, and other functionality accordingly, and send the email in case an issue is found.
- This script ensures the quality of applications/websites with automated testing, which saves time.

Automatic Daily Reporting and Statistics.

- Develop a Node.js application that interacts with the database, curates the counts, analyzes the data, generates visual statistics, and shares them with the team.
- This process saves time by reducing manual involvement and completes the work in a simple and timely manner.

Mini Projects and Experiences

- **Instant Card** : Android app that generates business or visiting cards by simply entering information and uploading a company logo or profile picture.
- **Gaming Portal**: Developed a gaming portal using React.js and CSS, integrating Telecom APIs for billing and MT messaging, featuring an attractive UI.
- **Quiz Portal/ app**: Developed a quiz portal using React.js and CSS with the backend in node js express to play quizzes and integrated the Telecom APIs for billing, and it is deployed with top telecom operators, including Jazz, Zong, and Ufone.
- **BlogBook (ongoing)**: Developed the BlogBook app in React JS and React Native for Android, which allows users to post blogs and read blogs, featuring the like and sharing functionality. I have used Node JS, Express JS, and PG for the database in this project.
