Project:

Final Year Project (Intelligent Tutor System):

This Project involves the development of a dedicated website that enables students to create personalized profiles and connect with tutors. The website offers powerful search and location-based matching capabilities, allowing students to find tutors based on specific criteria. It simplifies the hiring process with a "hire" button that notifies tutors via email. Communication between students and tutors is facilitated, enhancing the learning experience. The backend is powered by Java with the Spring Boot framework, while the frontend is developed using React JS, ensuring a user-friendly platform, Maintainable and efficient Java code.
