ABOUT ME

Result-driven Computer Science graduate. A solid foundation in software development and a passion for mobile app development using Flutter. Proficient in Dart programming, I have hands-on experience creating user-friendly interfaces and implementing efficient state management. Committed to continuous learning and adapting to emerging technologies, I am eager to contribute my skills to dynamic and innovative projects, demonstrating a strong commitment to excellence in mobile application development.

WORK EXPERIENCE

25/10/2023 – 15/11/2024 Rawalpindi, Pakistan
FLUTTER DEVELOPER ALRIGHT TECH PRIVATE LIMITED

- Design and develop mobile applications using Flutter framework.
- Implement responsive UIs to ensure a consistent user experience across different devices.
- Write clean, maintainable, and efficient code in Dart.
- Connect the application with APIs for data retrieval and manipulation.
- Collaborate with cross-functional teams, including designers, product managers, and other developers.
- Participate in code reviews to ensure code quality and share knowledge with the team.
- Stay updated on Flutter and Dart advancements, and incorporate new features.
- Choose and implement an appropriate state management solution based on the complexity and requirements of the project.

06/04/2023 – CURRENT Chicago, United States
DATA ENTRY SPECIALIST STELLAR COLLEGE CHICAGO

- Efficiently manage and perform data entry tasks, ensuring accuracy and attention to detail.
- Collaborate with team members to streamline data collection and entry processes, resulting in increased productivity.
- Conduct data quality checks and troubleshoot discrepancies, ensuring data integrity and reliability.
- Assist in the development and maintenance of databases, optimizing data organization and retrieval.
- Maintain confidentiality and adhere to data security protocols to protect sensitive information.

EDUCATION AND TRAINING

30/09/2019 – 15/06/2023 Rawalpindi, Pakistan
BACHELORS IN COMPUTER SCIENCE Arid Agriculture University Rawalpindi

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s): **ENGLISH**

DIGITAL SKILLS

Flutter | Dart | Databases | Rest APIs | Team Work | Leadership | Excel | Word | Programming | C++ | Data Operator | Firebase

PROJECTS

VeFix Emergency App

In this project, user can send help request to helper when faces problem regarding vehicles. Helper turns on availability and receives the request from user and helper has two options whether he rejects the request or accept the request. We use firebase as backend and mobile interface on Flutter.

Travel App

In this project, user can see different places, read about the experience of people about which the user selects the place. Built multiple screens and used the concept of navigation, different widgets of Flutter.

Contact List App

Developed a contact list mobile application using Flutter, incorporating SQLite for efficient data storage and retrieval. Implemented a user-friendly interface

Weather App

Developed a weather application using Flutter, integrating weather data through a weather API. Implemented responsive UI design and efficient state management to deliver a user-friendly experience.

Wiremi

Developed a user-friendly mobile app, "WireMi," using Flutter, showcasing strong UI/UX design skills and proficiently implementing state management concepts for optimal user experience.

Phone Directory

In this project, C++ language is used where user can add phone number, edit it, search it or delete it. I used filing concept to do this.

Profilio

Developed a cross-platform mobile application using Flutter, enabling users to create, customize, and share professional CVs. Implemented custom APIs for data management and interactions, ensuring secure and efficient data handling. Utilized GetX and Provider for state management, providing a seamless and responsive user experience.

GoGrub

Created a cross-platform mobile app using Flutter, allowing users to browse and order a variety of dishes such as pizza, burgers, and rice. Developed and integrated custom APIs for menu management, order handling, and secure payment processing. Employed GetX and Provider for state management to ensure a smooth and responsive user experience.

Seyyah Mobile

Worked on the Seyyah mobile app, built with Flutter, which offers eSIM packages and free MBs. Developed key screens, integrated APIs for popular countries and free MBs features, and optimized state management using the Provider package. Ensured seamless user experience through efficient API handling and responsive UI design. Collaborated with the team to implement app functionalities and resolve technical challenges.
